

Juan Pablo Lozano

10+ years of experience in frontend development

Proactive, results-driven individual. Passionate about web development since I was 15 years old when I created my first website. Over the years, I have honed my skills and expanded my knowledge to include mobile app development, providing me with a versatile skill set.

In addition to my technical skills, I am also deeply passionate about interface design.

Professional Experience

MEDIKTOR - Web Team Lead (2016-2023)

- As the leader of the web platform responsible for 60% of the company's revenue, I helped the company close three investment rounds and increase revenue
- Mentored and guided five team members, fostering their professional and personal growth.
- Improved the satisfaction rate of clients from Asia, Europe, and South America by creating an easy-to-integrate SDK, clear documentation, and providing top-notch support.
- Successfully completed the migration from PHP to Typescript, Vue, and Webpack using OOP, increasing the codebase from 20 components to over 150+, improving speed and stability.
- Increased unit test coverage by 40% to ensure code quality and minimize bugs.
- Pushed for the adoption of best practices and tools, such as eslint, git hooks, and Storybook, to establish standard procedures for the team and incorporate new technologies.
- Delivered all appointed projects (50+ integrations) on time, meeting client expectations and deadlines.
- Successfully led the integration of the product into companies like AXA (across 5 countries), Mapfre (across 2 countries), and Sanitas, expanding the product's reach and impact.

WAVEZOO - Consulting (2020-2023)

- Successfully created the brand from scratch, including logo, color scheme, and other elements, resulting in a unique and distinctive brand identity.
- Utilized Figma to wireframe and design high-fidelity user interface screens, resulting in visually appealing and user-friendly designs.

Laravel

- Designed and developed over 30+ components using Vue and Nuxt, resulting in a highly functional and performant website.
- Proposed and designed new features to increase user engagement.

ROLINE SYSTEM - *Technical Lead* (2014-2016)

- Led the development of Roline Insell and Roline Assist, both tools for hotels, by utilizing Angular, Node and PHP/MySQL as the main technology stack. This allowed the company to offer a highly competitive product in the market and achieve sales success.
- Led a team of 4 developers and designers in upgrading the frontend and backend technology stack from jQuery to Angular and Vue. This modernization resulted in enhanced website performance and user experience.

SELF-EMPLOYED (2010-2014)

- Successfully designed and delivered Teka official website and DC Embassy (DC Shoes) - both renowned in the industry, as part of my work developing web and mobile applications for various companies.
- Utilized Vanilla Javascript, jQuery, Angular, React and Vue to develop 50+ SEO-optimized and user-friendly websites and landing pages from scratch to deployment.
- Created a custom framework using Laravel that resulted in a 50% reduction in delivery time and helped meet project deadlines.
- Managed Linux servers tailored to the clients needs, allowing them to reduce costs by 30%
- Developed and brought to market two native iOS applications using the Swift programming language, overseeing the entire process from conception to launch.

WARMUP INTERACTIVE (2006-2010)

- Developed standard compliant websites using PHP/MySQL, CSS and Javascript, resulting in websites that meet industry standards and provide optimal user experience.

Education

Bachelor (2000-2003)

Instituto Nstra. Sra. de Lourdes (Montevideo, Uruguay)

Computer Engineering (2004-2006)

Universidad de la República (Montevideo, Uruguay)
